Chapter 1. Instructional Scenario – Border Crime Reporting & Analysis

Project Title: Creating an Analytical Report on Border-Related Crime

Sector: Border Security / Law Enforcement / Technical Communication

Role: Instructional Designer & Technical Writer

Objective: Design and deliver a bilingual instructional module that guides learners through the process of identifying border-related crimes and producing a structured analytical report using simplified English for operational clarity.

Book: English for Border and Coast Guarding – Frontex

Audience: Border Guard Officers

Chapter 2. Learning Outcomes

Learning Outcomes

- **Language Objectives:**

- Use key terminology related to border crimes (e.g., smuggling, human trafficking, illegal crossing).
- Apply formal English structures for law enforcement communication.
- Practice pronunciation and functional phrasing for field scenarios.

- **Technical Communication Objectives:**

- Simulate arrest procedures using operational language.
- Analyze crime trends using structured reporting techniques.
- Draft a simplified analytical report based on statistical data.

Chapter 3. Instructional Flow

Table 1. Instructional flow during the lesson

Phase	Activity	Skills Developed
Vocabulary Activation	Definitions and pronunciation of crime-related terms	Terminology fluency, oral clarity
Scenario Simulation	Role-play of arrest procedures	Field communication, phrase accuracy
Report Planning	Review of crime statistics and reporting phrases	Analytical thinking, document structure
Report Drafting	Collaborative creation of a crime report	Structured writing, compliance tone

Chapter 4. Analytical Report: Stolen Vehicles at Border Checkpoints

Analytical Report: Stolen Vehicles at Border Checkpoints

Date: 16 October 2025

Prepared by: Officer A. Nowak

Location: Border Crossing – Dorohusk (PL–UA)

Subject: Increase in Stolen Vehicle Interceptions

1. Summary

This report provides an overview of recent incidents involving stolen vehicles intercepted at the Dorohusk border checkpoint. It highlights emerging trends, methods used by offenders, and recommendations for improved detection and cooperation.

2. Recent Developments

Between August and October 2025, there was a sharp increase in the number of stolen luxury vehicles identified during routine inspections. Compared to the previous quarter, the number of flagged vehicles rose by 38%. Most vehicles were registered in Germany and France, with suspected destinations in Belarus and Kazakhstan.

3. Modus Operandi

Offenders used advanced keyless entry bypass tools and cloned VIN plates. In several cases, forged ownership documents were presented, including fake invoices and customs declarations. Vehicles were transported via low-loader trucks to avoid direct driving across borders.

4. Detection Methods

Border guards identified discrepancies through:

- VIN verification against EUROPOL and Interpol databases
- Physical inspection of engine block markings
- Document cross-checking with customs systems

Challenges included:

- Sophisticated forgery of registration papers
- Inconsistent VIN placement across vehicle models

5. Recommendations

- Increase training on document fraud detection
- Deploy mobile VIN scanners at secondary checkpoints
- Share intelligence with neighboring countries on active smuggling routes
- Update SOPs to include new forgery indicators and digital verification tools
